Professional Summary

Aspiring **Java Backend Developer** and Computer Science undergraduate with an **8.64 CGPA**. Strong hands-on expertise in **Core Java (OOP, Multithreading, Collections)**, **Spring Boot**, **Spring Security**, **Spring Data JPA**, **RESTful APIs**, and **MySQL**. Practical experience architecting layered enterprise backends with transactional integrity, concurrency management, and global error handling. Strong analytical foundation with **210+ DSA problems solved** on LeetCode.

Technical Skills

Languages: Java (Core & Advanced, Java 17/21), C++, SQL, Python

Backend Frameworks: Spring Boot, Spring Security, Spring Data JPA, Spring MVC, Hibernate ORM, JDBC, Servlets

Architecture & Web Services: RESTful APIs, Layered Architecture (Controller-Service-Repository), DTO Pattern, JSON

Databases & Data Management: MySQL, Relational Schema Design, ACID Transactions, Entity Relationships, JPQL

Developer Tools & Testing: Maven, Postman, Git, GitHub, IntelliJ IDEA, VS Code, JUnit Basics

Core Concepts: Object-Oriented Programming (OOP), Concurrency & Multithreading, Data Structures & Algorithms (DSA)

Projects

BookMyShow Backend API Service

Java, Spring Boot, Spring Data JPA, MySQL, Maven

- Engineered a scalable movie ticket booking backend utilizing **Spring Boot** following industry-standard **Layered Architecture** (Controller → Service → Repository → DTO).
- Implemented atomic booking workflows with **@Transactional** execution to enforce ACID guarantees and prevent race conditions or double-booking during concurrent seat reservations.
- Designed normalized database schemas and **JPA entity relationships** across 6+ entities (*Show*, *ShowSeat*, *Booking*, *Customer*, *Movie*, *Theatre*) with custom **JPQL queries** for seat availability and updates.
- Built centralized exception handling via **@RestControllerAdvice** delivering standardized error responses (**ApiError**) with appropriate HTTP status codes (400, 404, 409) alongside **Jakarta Validation**.
- Documented and thoroughly verified **10+ REST endpoints** using Postman for end-to-end booking, cancellation, and show discovery.

Real-Time Face Punch Detection Attendance System

Python, OpenCV, Web UI, Render

- Built and deployed an automated biometric attendance web application featuring **real-time facial detection, registration, and punch tracking**.
- Implemented secure **Role-Based Access Control (RBAC)** supporting custom views and permissions for **Student, Faculty, and Admin** dashboards.
- Deployed the production application on the **Render Cloud Platform** ensuring high availability and seamless remote access.
- Live Demo:** real-time-punch-detection.onrender.com

Education

Sandip University, Nashik

Bachelor of Technology (B.Tech) – Computer Science & Engineering

2024 – 2028

CGPA: 8.64 / 10.0

Saraswati Vidya Mandir Senior Secondary School

Senior Secondary (Class XII) – **76.33%** | Secondary (Class X) – **93.66%**

Achievements & Coding Profiles

- LeetCode Problem Solver:** Solved **210+ Data Structures and Algorithms** problems in Java and C++ with **380+ submissions** and over **100+ active coding days** ([Profile Link](#)).
- NASA Space Apps Challenge:** Participated in the international hackathon; collaborated in an agile team to design and pitch an innovative technology solution within a 48-hour sprint.
- Academic Consistency:** Maintained an outstanding academic record with an **8.64 CGPA** across university semesters.
